Final Details Concerning our Base Hospital

LT.-COL. BIRKETT SPEAKS TO THE MEN UNDER HIS COMMAND

OBEDIENCE KEYNOTE FOR RANK AND FILE

Invaluable Services of Major Yates and Others Were Gratefully Acknowledged

It was a momentous occasion for some hundred and fifty undergraduates of the Faculty of Medicine yesterday, when Lieut.-Col. Birkett, the dean of the Faculty and head of the Base Hospital, spoke to the men who had volunteered for active service with this unique unit. The men are all anxious to serve with this contingent and there was practically every man out who had volunteered. It was a momentous occasion in more ways than one, as Dr. Birkett had on the platform with him Major Yates, Lieut.-Col. Robert Starke, Dr. Elder, Col. Adamo, and Ma-

DR. GEORGE ADAMO, Professor of Pathology, who will accompany the McGill General Hospital to France.

for Burnett. These are the men who have to be thanked for the organization of this unit. Major Yates especially, says Dean Birkett, has been of invaluable assistance and through his courtesy McGill now has apparatus with which to start stretcher drill this week. Dr. Birkett is to be the head of the organization which is to have on its staff Dr. Adamo, Dr. Elder and many other men who are professors in the college.

Dr. Birkett said in introduction, "This is a long-awaited and very momentous occasion in the lives of many of you men." The officers have all been chosen and provisionally accepted by the authorities in Ottawa. It was hard to pick them as so many men who have already proven their sterling qualities are willing, anxious and eager to go.

It was equally arduous a task choosing the nurses who all had to be graduates of the Royal Victoria and Montreal General Hospitals. "This was possibly the largest task of all as three nurses volunteered for every one that could be accepted. All of these have now been chosen and half their number leave for Quebec this week as they too must undergo military training. Their diploma does not mean that they know all of the nursing game. These nurses have to undergo a strenuous month's training before being accepted.

Concerning the undergraduates who act as dressers, the number is very limited. There are all told only 38 of these wanted. These would most possibly be the senior men of the college, but only the best men could be accepted. There are only 28 ward orders required. These men would have somewhat professional duties. The duties of the other men who are chosen will be anything that may be ordered them to do, general cleaning up work and things to do with the general sanitation of the hospital. In fact any routine work would fall to their lot. Only the willing workers can go with this unit. It is the burden of Dr. Birkett's speech. There is only one condition upon which students can be accepted, that is implicit and unquestioning obedience. The men must realize that the one who gives the order is not only superior in rank, but also in experience to the one who receives the order. No man may go with any conditions save this one. This is the greatest factor in making a successful organization and a harmony in which there is no discordant note. There is no use in volunteering under conditions, as there will be no promises made to any one. While those who have medical qualifications will get first chance, all will enlist as privates and will receive private pay which is \$1.10 a day or \$33.00 a month. The Government furnishes certain rations, but these are not all that could be desired and the men will be asked

4.45 p.m.—Physical Society lecture on "Marconi Military Wireless System."
8.15 p.m.—Meeting of Oriental Society in Engineering Building.
Lecture by Mr. Emanuel.
8.00 p.m.—Rehearsal of Senior Play in R.V.C.

To-morrow

1.00 p.m.—R.V.C. 1st Class Meeting in English Room of R.V.C.
Feb. 4.—Class Meeting of R.V.C. 17, in English Room of R.V.C., at one o'clock.
Feb. 4.—Picture of R.V.C. Partial Play will be taken at 1.15 p.m.
Feb. 5.—Senior Play in Convocation Hall.
Feb. 7.—Rehearsal Concert in Union by McGill Orchestra.
Feb. 13.—Hockey match, Queen's at McGill.
Feb. 13.—Medical Dinner.
Feb. 20.—Hockey match, Varsity at McGill.

ORCHESTRA PRACTICE.

A well attended and enthusiastic rehearsal of the students' Orchestra took place last night. Programmes for the Senior Play and the Sunday Concert received careful attention. It is hoped that the enthusiasm and snap which the orchestra has developed will in some measure compensate for the lack of polish and accuracy that its work inevitably shows.

Laval Paper Passes Away

L'Etudiant Did Not Meet With the Approval of Religious Authorities

It has been a long time indeed since the mighty press entered into a conflict and came out second best. Such has been the case, however, and that very near to us in Montreal. The paper issued by the students of a sister university has been forced to stop publication, we would like to add, to the sorrow of all. Truth compels the statement that it is not much regretted save by the enterprising few who published it, and their supporters.

The paper in question, "L'Etudiant," has been issued for the last four years, the editorial body being made up of Laval undergraduates. Its downfall is the result of a disagreement with the religious authorities of the university. The paper has, from time to time, been publishing articles whose tone did not meet with the approval of the authorities. Objections were immediately put forward but were not heeded by the "L'Etudiant." The result was disastrous for the paper, as Archbishop Bruchési and the board of governors of the university decreed that it should cease publication. It may here be noted that the position of "L'Etudiant" was materially different from that of the McGill Daily, the official organ of the undergraduate body. The Laval paper was purely unofficial, and was edited by a committee of students who had full power of publication and were alone answerable for the paper's policy. As remarked before, the students of Laval do not appear to be particularly upset by the official veto, and the loss of the paper is not greatly deplored by the majority.

PROF. L. V. KING GIVES LECTURE

This afternoon at 4.45 there will be a meeting of the McGill Physical Society in the Physics Building. Prof. L. V. King, well known to all the students in the university, will give a lecture on "The Marconi Military Wireless System."

This has always been a fascinating subject and now when it is playing such an important part in the affairs of the world, it should command the interest of all the students in the university. For all those intending to go to the front as officers, a knowledge of some of the fundamental facts about this subject would be very valuable, and indispensable in the case of those going as engineers. All the men taking the course in wireless telegraphy will profit greatly by attending this lecture and it is hoped that they will all turn out.

Prof. King is considered one of the premier physicists in the Dominion and is held in high esteem by all who have ever had the privilege of hearing him lecture. It is hoped there will be a record attendance this afternoon to hear a lecture on the subject by such an authority, and all those interested are cordially invited to attend.

E. J. Sinclair, M.D., '18, is a patient in the Royal Victoria Hospital. He was operated upon recently for appendicitis.

"Billy" Newhook, M.D., '17, who was injured in wrestling bout recently, has recovered sufficiently to be discharged from the hospital.

Upon a suggestion of the Second Year Meds., a modern drinking fountain has been installed in the old Medical Building by the Faculty.

A class meeting of R.V.C. 17 will be held on Thursday, Feb. 4th at one o'clock in the English Room of the R.V.C. Business: To elect debaters.

From the "Queen's Journal" concerning last Friday's basketball game, in Kingston:
"The intercollegiate basketball season opened on Friday afternoon, when Queen's engaged McGill. The game was an interesting one to watch, although Queen's were defeated, they gave a good account of themselves. It cannot be denied that McGill has a great team, their chief characteristic being good combination. They worked well with one another, the ball passing freely from man to man. This kind of play always brings results. It is easier on the men and insures a place for every man and every man in his place."

Leading Lady Unable to Act Friday Night

Senior Play Star May Have to Stay Out of Production

SUFFERING FROM ACUTE LARYNGITIS

Miss Harvey Contracts Sickness Likely to Prevent her From Acting

Yesterday, the people interested in the production of the Senior Play, received rather a hard set-back when it was learnt that the leading lady was laid up at her home with a bad cold. It is a very late date now to start out to train some other person to fill the very difficult role which Miss Harvey had to take. Celia, as Miss Harvey is called when she is on the stage, has contracted an attack of acute laryngitis, which will very likely make it necessary for her to remain off the stage on Friday evening. However, a very able understudy has been

DR. H. B. YATES, Who will accompany the McGill General Hospital to France.

unearthed in Miss Mary Macoun, who, when she has mastered the difficult lines, ought to carry out the role of Celia to perfection. It is very unfortunate that Miss Harvey should have been taken ill just at this time, but it is not at all definite as yet, whether she will be able to act or not on Friday evening.

Everything is going smoothly in the production of the piece, with the exception of Miss Harvey's illness. The different members of the cast are all well drilled in their parts and during this week are paying particular attention to perfecting the expression which it is necessary for them to render in some of the scenes. The scenes in which the aunt becomes rather intoxicated after having applied herself somewhat too frequently to the brandy decanter, is very good and the way in which she acts the part of an individual under the influence of liquor is undoubtedly most realistic. When Bobby expresses his wish to take part in a little bout with the whiskey and soda, he seems to put his whole heart into the line, "Whiskey and soda, what, ho!" Tickets for the play can be had at the Union or Strathcona Hall, or from any member of the Senior Year in Arts. The play promises to be a great attraction, as the tickets are selling fast. The hope of the R.V.C. is supposed to accommodate about eight hundred people and the management of the play are counting upon a capacity house.

MR. M. POPE WILL DELIVER ADDRESS

All those interested in the meetings of the Architectural Association will be pleased to hear that Mr. M. Pope will deliver an address upon "Estimating" on Wednesday evening, at 8.15. The date of the meeting had to be changed to then from the date previously decided upon, Tuesday evening. The speaker will deal with both the English and Canadian methods, criticising each and endeavoring to show the advantages and disadvantages resulting from the respective methods, so far as he has been able to judge from his own experience. The comparison will be the more pertinent as Mr. Pope, who has been a resident of this country for some years, comes originally from Great Britain. He has already had considerable experience of building work. For several years he was engaged in active architectural practice, giving up this work at length for construction. He has been interested in this branch of business for some time in Montreal.

All those who are interested in the subject of Mr. Pope's address are cordially invited to attend.

POOL TOURNAMENT

Entries for the pool tournament are not coming in as fast as was expected and the House Committee may feel obliged to cancel it altogether. They feel that unless there is more enthusiasm shown in the matter, it is not worth while going to the trouble of arranging for a tournament. They have before announced that unless there are at least twenty entries in by Tuesday night the tournament will be called off.

SENIOR PLAY

A rehearsal of the Senior Play is to be held to-night at eight o'clock in the R.V.C.

PARTIALS R.V.C.

The picture of the Partial Play will be taken this Thursday, at 1.15 p.m. All in the cast must be present.

The Mock Parliament

It is to be expected that, as circumstances are at McGill this winter, the Chester Macnaughton Reading Contest (for which there are, we understand, nine entries) should bring more men out than did the proposal for an intercollegiate debate. There is no reason why the students, as a body, should not give active support to a Mock Parliament as well. This year's events are presenting a wealth of material for live discussion never before met with in the history of the University. The Regiment is, and should be, the main interest this winter, but a few evenings could be easily spared from other activities to devote to a Mock Parliament. It is everyone's duty at this time to put public questions before matters merely academic. No other method of acquiring a knowledge of national affairs while at College is so effective as attendance at the sessions of a Mock Parliament, provided the individual does some work himself and is not merely content to listen to the few who make themselves of value to the meeting. The main essential to a successful session is, of course, the securing of adequate leadership for the parties. The main reason for the deadness of certain societies this year is the fact that those who usually lead them are too busy drilling for overseas work to devote attention to anything else. This difficulty should not prove insurmountable. Suggestions from past leaders linked with some "bustling" on the part of this year's executive should speedily produce results, if the student body is at all favorable, and it is to be hoped that the latter will lend proper support to such a valuable college institution as the McGill Mock Parliament. Several successful sessions have been held in past years, if it is allowed to die down altogether this winter, it will be hard work to get the Literary Society on a sound basis next year.

The Approaching Hockey Matches

The first of our home games is to be played in about a week and a half's time. Students need hardly be reminded that it is their imperative duty to the University to turn out in force to both matches, and give the players support worthy of Old McGill. The necessity of efficient rooting is obvious. It may be well to note, however, that there is also a duty which graduates and students owe to the Hockey Club executive, that of adequate financial support. Allotments of reserved seats to subscribers will be made shortly, and let us hope there will be a full list, as this will make matters much easier for everybody.

THE SENIOR PLAY ALPHABET

WHICH TELLS US WHO'S WHO

It has been noticed with regret by the Arts students that their fellow sufferers in Science and Medicine are becoming more and more oblivious to the charms of literature, in their eager pursuit of mere microbes and common calculus. Some indeed have reached such a shocking state of ignorance that they can no longer read. Impossible, you say. But how else explain the fact that many of them know nothing of the Senior Play, although posters have been up for a week.

The Intellectual Arts students would be false friends if they did not make some effort to rescue the poor unfortunate from their horrible plight. An appeal is therefore made to all Arts students to teach, before February 5, the following alphabet, which in addition to the actual letters imparts useful knowledge concerning the above-named play, to their poor deluded comrades:

A's for the audience—that means for all.
B's for the Butler of Farraday Hall.
C's for Celia who won't wear green hose.
D's for the damns—there are several of those.
E is for Evelyn—a widow not sad.
F is for Farraday—her selfish old dad.
G is for Grace who eats cake and coughs.

H is for Henry Steele, deadliest of bores.
I's for Aunt Ida—addicted to wine.
J is for jokes, there's one in each line.
K is for kissing, of course there's a lot.
L's for the letter that tangled the plot.
M is for Madge, whose husband's away.
N's for the nut who won't see the play.
O's for the Orchestra, music's their hobby.
P's for Phyllis who loves "darling Bobby."
Q is for questions—the Admiral's passion.
R is for Raleigh, a young man of fashion.
S—Colonel Smith who does not stay dead.
T is for Tarver with his empty head.
U's for the ushers, who'll show a seat.
V is for Vavasour, whose aim is to cheat.
W's for Wobbler, Guess who is meant.
X is for kisses in the letter C sent.
Y's for the year which produces the play.
Z is the zeal makes them work night and day.

Princetonians Grad School Increases Work

Want to Know Why Men Came to Princeton

Somehow of an innovation has been introduced by the Graduate School Committee on Preparatory School of Princeton University, which has sent out a circular letter to all graduates and past students in an effort to discover the considerations which led them to enter Princeton in preference to other universities. The committee hopes in this manner to render its work more efficient and to eliminate useless activities.

The Questions.

1. Who decided the selection of Princeton in your case? You or those interested in you?

2. What considerations were most influential in the decision? Educational advantages, nearness to home, environment at Princeton, relatives among alumni, Princeton men as a class, sentiment? If any other consideration please name.

3. Did you or your school receive any Princeton publications, such as the Descriptive Handbook, Brice-a-Brac, Tiger, Princetonian, Princeton pictures, etc?

4. Did any of these have any influence on your decision?

5. Which publication do you think the most useful in creating interest in Princeton?

6. Did you ever visit Princeton before entering college?

7. Did the visit influence you in your decision?

8. Did any Princeton organizations (Musical Clubs, Triangle Club, athletic teams, etc.) visit your home town?

9. Did these in any way influence you in your decision?

10. Were intercollegiate meets or other contests promoted in your school by alumni associations of any college?

11. Do you think they stimulated interest in that college?

12. Did any Princeton speaker ever address your school?

13. Did his talk influence you?

14. Do you know of any desirable boys prevented from entering Princeton because of the cost of a college education at Princeton?

15. Can you suggest any new means of reaching new boys?

Plans are being made by the University of Pennsylvania to build a submerged stadium with a seating capacity of 100,000. This stadium should provide seats enough for even an Army Navy game. If the proposed plans are finally carried out.

President Thomas of the Chicago National League has received verbal assurance from Paul De Jarden that he will sign a Chicago National League contract as soon as he gets his sheepskin from Chicago university next spring. Des Jarden is one of the best all-around athletes the university has ever turned out. He is a pitcher.

John G. Rush, director of athletics at the University School of Cleveland, was chosen head coach for the Princeton football team by the Athletic Board Jan. 19.

J. J. Eller of the Irish-American A.C., of New York, made a new record for 120-yard hurdles at the Brooklyn, N.Y., College games Saturday of 14. The former record was 14.2-ss. and was made by himself.

It is doubtless strictly true that

FINAL DETAILS CONCERNING OUR BASE HOSPITAL

(Continued from page 1.)

most likely to contribute to the general mess, so the men who are looking for the money must not be surprised at this.

The proposal is to select the men from the students who have volunteered. None of the students have been asked to go and all positions could be filled over and over again. Letters have come in from graduates from the Pacific to the Atlantic and all through the States asking to be taken in any capacity whatever.

The interest in the unit is not confined to the university. There are many lads throughout the city who are working hard to make extra dresses. A few days ago a check came for \$1,500 from the Soldiers' Wives' League. A Graduate who cannot go sent in a donation of \$100. The press of England and the United States has been talking about the splendid offer. When Lieut.-Col. Birkett was in New York at a luncheon, the health of the project was proposed.

All students should be proud to go in any capacity whatever, without condition, to help mankind and to bring credit upon our old Alma Mater. Nothing but the highest praise can come upon such an organization if the men go in the right spirit.

Soon there will be started a stretcher drill in the Assembly Hall. All students will be expected to take these in which will be held three or four times a week.

In Ottawa the authorities are most enthusiastic and Major-General Hon. Sam Hughes says that this unit will leave Canada equipped better than any unit has yet been which has left these shores. His Royal Highness the Duke of Connaught and the distinguished Visitor of the university, said to Dr. Birkett that he would esteem it a great favor to inspect such a unit, with this Col. Birkett introduced Lieut.-Col. Robert Starke, the O. C. of the McGill Battalion.

When the cheering had quieted, the Colonel said that the men should be most serious in this undertaking. If some men of Canada had not been serious in their military work during the past twenty-five years, it would have been impossible to mobilize and send out 25,000 men in a few weeks. One thing is most essential to make any work. It is upon discipline and discipline alone that the success of a military organization depends. He quoted from Baden-Powell and O'Leary's guide to support his contention. Every man should be taught to be polite and willing to do what he was told. Lieut.-Col. Starke then paid a tribute to Dr. Birkett, saying that he

THE EXPOSURE OF THE OXO CO.

Recent Investigation has brought to Light the Fact that the Oxo Co. and the Liebig Extract of Meat Are the Same

Among the firms who have been most prominent in the papers lately by reason of the patriotic tone of their advertisements is "absolutely pure" Oxo in the Trenches, and in the forefront of the fight generally. This preparation, until after the outbreak of war, was the property of another undertaking, Liebig's Extract of Meat Company, and despite the separation of the interests of the two concerns seem still to be mingled in a manner which it is very difficult to understand. Joint advertisements have been inserted in the press, in which statements are made to the effect that Liebig's and Oxo "are German companies or have German directors, or that Oxo is a German article," it being emphatically asserted, in heavy type, that "Oxo Ltd., and Liebig's Extract of Meat Co., Ltd., are both British concerns; neither Oxo, nor any product of either company, have ever been made in Germany." The final crusher, printed in yet more prominent characters, is the sentence: "Oxo is British."

Adopting the old adage as regards the priority which should be bestowed upon age, we will deal first with the Liebig's Extract of Meat Company—a concern possessing the enormous capital of £1,000,000. Since its formation the following gentlemen have acted as directors: Emmanuel Bouteiller, Charles Gunther, Baron de Marn, Othmar, Felix Grisar, G. Scheibler, E. P. Grisar, R. L. Gunther, C. E. Gunther, M. G. Carr, A. Osterle, and Wilhelm von Mallinckrodt.

Surely this little collection is entitled to be added to Frodo's list of "England's Forgotten Worthies," and tagged on to "the Joneses, the Smiths, the Davises, and the Drakes." Possibly the next advertisement will ask us to take a cup of Oxo and drink up, for the sake of Auld Lang Syne! The last five constituted the board at the time of the outbreak of war, since when Mr. von Mallinckrodt has resigned, and Mr. Carlisle is in his stead. The place of birth of Mr. C. E. Gunther (the chairman) is not mentioned in Who's Who, but his first wife was a German lady, and he was educated at Dülmen, Cologne and Liege.

The shares of the company are divided in a very peculiar way—nearly 200 shareholders, whose names appear upon the register, holding just over half the capital (£853,655), whilst the balance (£146,345) is held by persons whom it is impossible to trace, as the certificates are made out to "bearer," and may, therefore, be owned by anybody. Living anywhere—possibly as were many of the original shares) by our enemies, as after they have been issued the directors have little or no control over them.

It is doubtless strictly true that

neither Oxo nor any product of either company has ever been made in any shape or form in Germany," but those who read the advertisement issued by the company, apparently for distribution to Germans attending the Brussels Exhibition of 1910, will breathe a sigh of admiration at the skillfulness of whoever composed the quoted sentence. For printed in German, it appears to be a translation from the Fatherland for their support principally on patriotic grounds. The following are a few passages, translated from British consumption.

"Liebig's Extract of Meat and its manufacture have always been subjected to the most careful control on the part of authorities of the highest rank in German science. This control was, at first, practised by Justus von Liebig himself, later by his son, Hermann von Liebig, as well as by Professor Max von Pettenkofer, to Carl von Voit. At present, Liebig's Extract of Meat is being controlled by the well-known and learned Privy Councillor of Medicine, Professor Dr. Max Rubner, of Berlin, and Chief Councillor of Medicine, Professor Dr. Max von Gruber, of Munich. It is only with their consent that the extracts received at the General Depot of the Liebig Company in Antwerp may be placed in the well-known stone jars and tins. Hardly has a half-century elapsed since German energy and vigilance commenced the manufacture of Liebig's Extract of Meat in far-off Rio de la Plata. . . . The company carries on operations, besides, on property in the territory of German Southwest Africa, of like enormous dimensions—a total of more than 1 1/2 million acres of land—almost equal in size of Saxony."

The possible explanation is that Privy Councillor of Medicine, Prof. Dr. Max von Gruber, of Berlin, and Chief Councillor of Medicine, Prof. Dr. Max von Rubner, of Munich, who "at the present time" control the manufacture of the extract, exercise their "doubtless ceaseless supervision" by means of telegraph, or thought transmission, such methods appeal to the "cultured."

Oxo is doubtless a very valuable property, and formed one of the principal assets—certainly the best known to the public—of the Liebig Company. For it is estimated that during the last dozen years no less than from one million to one and a half million pounds have been spent in advertising it. The prominence which it has thus attained is, of course, an asset of enormous value, and this colossal goodwill has been handed over to a company called "Oxo, Limited"—incorporated six weeks after the declaration of war! The shares were not, as would probably be supposed, listed, pro rata between those who had owned the trade mark, but were divided amongst a small circle mostly in large batches, the number of separate interests being but 21, although the paid-up capital is £200,000. The directorate is happily apportioned, two members (Lord Hawke and the Hon. P. H. A. E. Cochrane)

Great Postage Reduction Made

Domestic Instead of Foreign Postage Rate on Overseas Soldiers' Letters

Arrangements have been made whereby the ordinary rate of two cents per ounce applicable to all letters sent from Canada to the United Kingdom, will apply to letters addressed to British and Canadian troops on the continent. The rate on ordinary letters from Canada for the continent is five cents for the first ounce, and three cents for each subsequent ounce, so that this extension of the two cents an ounce rate to letters addressed to our soldiers on the continent, is a decided reduction in favor of correspondence going to the soldiers.

FENCERS ROUNDING INTO SHAPE FOR ASSAULT-AT-ARMS

A successful work-out was held by the Fencing Club last night in the Union. The attendance was rather disappointing, as several who were out for the first two practices failed to turn up. It is to be hoped they will not be so bashful next time, and that they will also postpone all "dates" they may have at that hour. The membership of the club is larger this year than for several years past. It is intended to keep on practising right up to exam. time, not to stop as soon as the intercollegiate assault-at-arms is over. There should be a good nucleus for next year's club.

Considerable time was spent last night at the first in practising the preliminary and fundamental positions such as the guard, and lunge. After this Professor Trautman took on each man separately, pointing out their faults and showing them how to improve.

was the only man who could have raised this hospital.

Dr. Adams then spoke, saying that too much emphasis could not be placed upon the responsibilities of the men going with this organization. He said that the officers would realize that the men were not only ordinary privates but were extraordinary privates. In this emergency the men should pocket their pride and accept anything. Too many have volunteered and these next weeks will be a testing period for the men.

Dr. Elder, a veteran of the Rebellion of '85, was the next speaker and dealt with discipline further. He said that no man should go with the idea that he was going to be bossed, or someone else could be bossed about. All will be bossed around. "If there is one man worse than another, it is the man who does what he is told with a grudge." The men have made mistakes in the past and will continue to make them, but the officers will whip it out of them as quietly and comfortably as possible. You won't be put in the guard tent for picking up the wrong end of the stretcher, but you will if you don't pick it up at all."

Dr. Birkett then asked Major Burnett to speak and the latter replied that the medical students in his company were the best men he had.

Lieut.-Col. Birkett then paid a hearty tribute to the sterling qualities of Major Yates, whose help had been invaluable in furthering the plans of the base hospital.

"THE FEW, THE IMMORTAL NAMES"

With the exception of the customary nominal sponsoring the Oxo company, and of Lord Hawke (whose small shareholding was doubtless balanced by his big name), all the other shares are held in large blocks, ranging from £5,000 in the joint names of two "anonymous" who gave their address as at Glyn Mills Lane, to 6,000 held by a publisher, also bearing the surname of Watson. Composite interests are the rule, such holdings clearly suggesting that there are in whose name they are held, or some of them are acting as trustees for somebody interested in the old Liebig company—especially when taken in conjunction with the amazing fact that there is no trace of a farthing ever having been paid for the right to use the name Oxo, nor, indeed, any mention that the name had hitherto been the property—and the valuable property—of another concern. Will Oxo, Limited, clear up the mystery?

The new company is a private concern, and is to be kept a very close corporation, no transfer of shares being registered without the previous consent in writing of all the directors for the time being. In the light of the patriotic declarations we have quoted, this may have been done with a view to seeing that nobody bearing a name of Teuton origin can sneak in to sully the fair pages of the company's all-British books.

By the way, should Oxo follow the example of its former proprietors, it will be a highly remunerative undertaking. We cannot say it is over-paying its hands. Several gifts of from 15 to 18 years of age tell us that they have had to work hard sucking labels on bottles from 8 in the morning till 8 at night (Saturday included—but with allowance of an hour for dinner and twenty minutes for tea), in order to get 7.5 in the end of the week. And some of these are the very supporters of their families. The conditions under which these poor creatures live are terrible. We should be sorry to think that this state of things is another proof that "Oxo is British."

ELIMINATION TRIALS TO BE HELD TO-DAY

220 Yd., 440 Yd. and 880 Yd.
Dash, the Relay and Potato
Races To-day

RACES MUST BE RUN TO-DAY

Only Those Who Competed in Elimination Trials in these Events to Run on Wednesday

There was a good turnout at the gym yesterday, when part of the elimination trials for the track events and for the potato race were held. Eighteen more entries were received which brings the total up to one hundred and sixty-eight. With such a large number of competitors and many dark horses in the field the outlook for an exceptionally successful meet on Wednesday is quite promising. In fact there is going to be no one-sidedness to any one of the events. But few a competition and good-natured rivalry will be the dominant feature in every race.

Owing to the nature of the track it was found necessary that elimination trials had to be held for the following events: The potato race, 220 yards, 440 yards, 880 yards, and the relay race. So all who are intending to compete in these events, if they did not run their elimination trial yesterday, must do so today at the usual hour, otherwise they will not be eligible to compete on Wednesday. In all the other events, however, entries will be received on Wednesday.

The following are the results of the trials held yesterday:

POTATO RACE.

1st heat—
Gould (1st), time 35 1/2.
Hickson (2nd).
2nd heat—
Elliott (1st), time 33 1/2.
Lynch (2nd).
3rd heat—
Dean.
4th heat—
T. D. McGregor (1st), time 34 3/4.
Dawson (2nd).
5th heat—
Schiffeld (1st), time 31 3/4.
Smyler (2nd).
6th heat—
Derouher and P. Falls (tied), 35 1/2.
Wash.

This entire Gould, Elliott, T. D. McGregor, Forbes, Schiffeld, Dorochee and Palmer to run on Wednesday. With the winner of the trials held today, the above will be eligible to compete in the semi-finals and the final held on Wednesday.

There was some fast times made in the 220 yard dash. Considering that these times were made whilst running against time, they are exceptionally good.

Jeffries..... 30 2 1/2 Secs.
Cushing..... 30 3 1/2
Crombie..... 31 2 1/2
Schiffeld..... 31 3 1/2
Schiffeld..... 31 3 1/2
Antliff..... 31 3 1/2
Falls..... 31 4 1/2
Forbes..... 32
Matthews..... 32 2 1/2
Tushey..... 34 1 1/2
Richardson..... 35 1 1/2

In the 880 yards, the following times were made:
Woods—2 min. 31 1/2 sec.
Miles—2 min. 35 sec.
Gerrie—2 min. 39 1/2 sec.
Ironstone and Dean also had a try at this event.

The only relay team which had their event was that of the class of Science 17. The team was composed of Cushing, Forbes, Crombie, Jeffries. Time, 2 min. 11 1/2 sec.

Eric Cushing and his whirlwind classmate, certainly, have a splendid chance to win this event. Eric is getting into condition and no doubt he will again hold down his position as all-round champion. However, he will have to do his best as there are several in the field right after his scalp.

In the 440 yard dash, Woods ran an exceptionally splendid race. Considering that such fast time was made whilst running against time, it is practically certain that the old record must go.

In the 880 yards, Woods ran an exceptionally splendid race. Considering that such fast time was made whilst running against time, it is practically certain that the old record must go.

Post entries are received in all events to-day, so if you have not already entered, it is not yet too late to do so. The following men are especially requested to turn out at the gym to-day at 5 o'clock for a trial in the events in which they have entered:

In the potato race—E. O. Thomas, S. G. Baldwin, W. A. Hunter, Keller, A. Farlinger, Loughery, Joe Sanders, J. G. Myers and anybody else who is able to pick up spuds. Also the following: K. Rosebrugh, R. M. Deew, A. N. Reynolds, I. Kert, H. C. Lee, and E. C. Brown.

For the 220 yards dash—E. O. Thomas, W. A. Hunter, Rex Hovey, Davidson, Almond, C. P. Roman, Fraser, K. Rosebrugh, R. M. Deew, J. G. Myers and W. C. Ross.

For the 440 yards dash—All those who intend to run this event. The following are especially requested to be out to-day: Karl Forbes, Don Smelzer, Rex Hovey, Eric Cushing, Bill

Juniors Meet M.A.A.A. Team This Evening

McGill Junior Hockey Team
Handicapped by Lack of Practice

The Junior team will meet M.A.A.A. on the arena from 8 to 9 p.m. Unfortunately the men have had no practice together as yet and so the game will probably be a hard one.

The following team are requested to turn out by 7.30 with their own equipment—
Scott,
Gibb,
Parsons,
Kelly,
Hunter,
Martin,
Armitage,
MacDermott,
MacGibbon.

YALE CAPTAIN DENEGRE OUT OF BOAT RACE

Is Not Likely to Row in the Harvard-Yale Race

NEW SHELL FOR YALE CREW

Many Old Men of the Crew Are Missing This Season

About the Yale Club in this city there is a well-defined report that for the second time in its history the Yale varsity crew will be without the services of its captain, Bayne Denegre, in its shell in the annual Yale-Harvard race. Clever oarsman as he is, Denegre has some sort of a technical defect in his watersmanship which causes him to clip his stroke and so upset the balance of the boat. Coach Nickalls has tried every way he can think of to make him correct this fault. But it hangs, and Capt. Denegre, rather than risk the weakness of his crew, has decided to stay out of the shell unless he can show without a question in the races that are to be rowed on the Schuylkill and at Carnegie Lake in the early season that he has been able to overcome the technical fault. Denegre retains all the responsibilities and duties of a crew captain, which at Yale are rather autocratic, and no one wishes to deprive him of them. He has expressed himself as determined to force the pleasure of rowing, and his Alma Mater if a better man can be found.

Changes in the Yale calendar bring the annual social week, with its pre-race and reception, into February instead of January, as heretofore. On that account, Capt. Denegre will not call his men together for preliminary rowing until Thursday, Feb. 11.

Yale will be without the services of Jack Appleton, the slender lad who stroked his crew to the hard-fought victory on the Thames last summer. Just who his successor will be is not decided. The spring work will still call for a strong crew, but Henry Coe of this city, who pulled out No. 6 in his freshman crew last year, is looked upon as the best of the material which the work of the past season has shown, even though he is a sophomore. He stroked the crew that won the fall regatta and did it well, beating crews stroked by Robert Gillman and Huntington Morse, the former the stroke of the Yale second eight of a year ago. Coe had an eight of novices in the fall regatta, but beat the second crew of thearsity outfit, which was stroked by Gillman. Therefore, it is the general belief among Yale men here that he will be called on for this important work this summer, if he improves, as it is pretty certain that he will.

Nickalls is not talking about the probabilities nor is Denegre in an official way; but it is known among the men who are interested in Yale rowing that both have a very soft spot in their hearts for Coe, who has the strength, the nerve, and the necessary coolness and bulldog tenacity of purpose to make an ideal stroke oar. Stuart Low, Moore, and Sheldon of last year's crew, are still in college, and all have expressed a willingness to row again this season. Seven of the second eight-oar crew are still in college to compete with them for places in the boat.

A new shell for the varsity crew is now being built in England on Nickalls' orders, and will be fitted with tholepins instead of the conventional row-locks which have been used by Yale crews for the past few years. Nickalls believes the new shell to be better. The new shell thus fitted will be the first used in the race on the Schuylkill. The balanced seating, instead of the uneven seating of the ordinary English shell, will be adhered to in the new model shell.

R.V.C. Hockey Game Won by Senior Team

Juniors Overwhelmed in Fast Game by the Senior Team

The R. V. C. Seniors kept up the good record which the class has always maintained, by gaining a sweeping victory over the Juniors, by the overwhelming score of 8-1. The place of this combat was the R.V.C. rink, and the time yesterday afternoon. The glass-like surface of this rink has been the scene of an action of many a hard fought match in years gone by, but yesterday's contest surpassed them all, not only for the brand of hockey displayed, but also for its many amusing situations.

On account of the extreme frigidity of the atmosphere, the crowd was necessarily small but those (and there were three or four) who dared to brave the icy elements, were furnished with plenty of excitement and amusement. Others who were not so courageous kept an eye on the proceedings from the windows of the college.

Yale will be without the services of Jack Appleton, the slender lad who stroked his crew to the hard-fought victory on the Thames last summer. Just who his successor will be is not decided. The spring work will still call for a strong crew, but Henry Coe of this city, who pulled out No. 6 in his freshman crew last year, is looked upon as the best of the material which the work of the past season has shown, even though he is a sophomore. He stroked the crew that won the fall regatta and did it well, beating crews stroked by Robert Gillman and Huntington Morse, the former the stroke of the Yale second eight of a year ago. Coe had an eight of novices in the fall regatta, but beat the second crew of thearsity outfit, which was stroked by Gillman. Therefore, it is the general belief among Yale men here that he will be called on for this important work this summer, if he improves, as it is pretty certain that he will.

Nickalls is not talking about the probabilities nor is Denegre in an official way; but it is known among the men who are interested in Yale rowing that both have a very soft spot in their hearts for Coe, who has the strength, the nerve, and the necessary coolness and bulldog tenacity of purpose to make an ideal stroke oar. Stuart Low, Moore, and Sheldon of last year's crew, are still in college, and all have expressed a willingness to row again this season. Seven of the second eight-oar crew are still in college to compete with them for places in the boat.

A new shell for the varsity crew is now being built in England on Nickalls' orders, and will be fitted with tholepins instead of the conventional row-locks which have been used by Yale crews for the past few years. Nickalls believes the new shell to be better. The new shell thus fitted will be the first used in the race on the Schuylkill. The balanced seating, instead of the uneven seating of the ordinary English shell, will be adhered to in the new model shell.

MCGILL TEAM WINS ANOTHER HOCKEY GAME

Shamrocks Were Whitewashed By Red and White Team

RAINBOTH SCORED FOUR GOALS

The McGill team won another game last night, beating the Shamrocks by the tune of 5 to 0. The game was not brilliant by any means, but was fairly good to watch. The Red and White did not seem to have much pep left after the Toronto trip but nevertheless played very steadily. The particular bright spots of the game were Rainboth, Kelly and Mullins. Rainboth and Mullins, for Shamrocks, Monty in goal for McGill played in brilliant style.

The game started at a lively pace. McGill carry the puck down from the face off, but the Shamrocks return. Rainboth, Kelly and Mullins, Rainboth coming up together in fine style but nothing results. Mullins rushes and shoots but Monty saves. Rainboth misses a good chance on a pass from Rainboth. Kelly rushes from the Shamrock end only to hit the ice in front of the McGill net. Rainboth returns like a flash, but has no luck. Then Kelly, Burrows and Ledoux come up, but have no success. Morris Rainboth and Rainboth come down abreast and on a nice pass from Morris the latter scores the first goal of the game. Mullins now replaces McGill and rolls in a long one, but Monty saves. Rainboth and Mullins drive away but Mullins steals the puck. Rainboth tries a couple of shots and nearly scores. Rainboth also misses. Brownie varies it a bit by trying a shot, but to no end. The McGill defence is playing well and little gets past them with the exception of a few long shots. The forwards are working well together but have trouble getting their passes properly placed, resulting in many off-sides. Brown Rainboth and Rainboth come down together and later passes a good one to Rainboth, who fails to get it past Mullins. McGill and W. Dunlop both take shots to no end. Rainboth and Kelly come down together and later passes a good one to Rainboth, who fails to get it past Mullins. McGill and W. Dunlop both take shots to no end. Rainboth and Kelly come down together and later passes a good one to Rainboth, who fails to get it past Mullins. McGill and W. Dunlop both take shots to no end.

Wash.

This entire Gould, Elliott, T. D. McGregor, Forbes, Schiffeld, Dorochee and Palmer to run on Wednesday. With the winner of the trials held today, the above will be eligible to compete in the semi-finals and the final held on Wednesday.

There was some fast times made in the 220 yard dash. Considering that these times were made whilst running against time, they are exceptionally good.

Jeffries..... 30 2 1/2 Secs.
Cushing..... 30 3 1/2
Crombie..... 31 2 1/2
Schiffeld..... 31 3 1/2
Schiffeld..... 31 3 1/2
Antliff..... 31 3 1/2
Falls..... 31 4 1/2
Forbes..... 32
Matthews..... 32 2 1/2
Tushey..... 34 1 1/2
Richardson..... 35 1 1/2

In the 880 yards, the following times were made:
Woods—2 min. 31 1/2 sec.
Miles—2 min. 35 sec.
Gerrie—2 min. 39 1/2 sec.
Ironstone and Dean also had a try at this event.

The only relay team which had their event was that of the class of Science 17. The team was composed of Cushing, Forbes, Crombie, Jeffries. Time, 2 min. 11 1/2 sec.

Eric Cushing and his whirlwind classmate, certainly, have a splendid chance to win this event. Eric is getting into condition and no doubt he will again hold down his position as all-round champion. However, he will have to do his best as there are several in the field right after his scalp.

In the 440 yard dash, Woods ran an exceptionally splendid race. Considering that such fast time was made whilst running against time, it is practically certain that the old record must go.

In the 880 yards, Woods ran an exceptionally splendid race. Considering that such fast time was made whilst running against time, it is practically certain that the old record must go.

Post entries are received in all events to-day, so if you have not already entered, it is not yet too late to do so. The following men are especially requested to turn out at the gym to-day at 5 o'clock for a trial in the events in which they have entered:

In the potato race—E. O. Thomas, S. G. Baldwin, W. A. Hunter, Keller, A. Farlinger, Loughery, Joe Sanders, J. G. Myers and anybody else who is able to pick up spuds. Also the following: K. Rosebrugh, R. M. Deew, A. N. Reynolds, I. Kert, H. C. Lee, and E. C. Brown.

For the 220 yards dash—E. O. Thomas, W. A. Hunter, Rex Hovey, Davidson, Almond, C. P. Roman, Fraser, K. Rosebrugh, R. M. Deew, J. G. Myers and W. C. Ross.

For the 440 yards dash—All those who intend to run this event. The following are especially requested to be out to-day: Karl Forbes, Don Smelzer, Rex Hovey, Eric Cushing, Bill

DARTMOUTH AND BROWN ATHLETES TO MEET AGAIN

Athletic Relations Renewed Between Two Institutions After Eight Years—Relay Race at Providence Feb. 20 Is First

Hanover, N. H.—Dartmouth College graduates and undergraduates are much pleased to-day over the announcement that athletic competition with Brown University is to be renewed this winter after a lapse of eight years. The first event is to be a relay race at Providence, Feb. 20.

In explanation of the renewal of competition between the Green and the Brown, Graduate Manager J. E. Ingersoll of the Dartmouth athletic council issued the following statement Tuesday night:

"The invitation to meet the Brown relay team in a dual race at the Providence A.A. armory, Feb. 20, has been accepted. For many years the two institutions have been in friendly relations, and in all branches of sport whenever satisfactory schedule arrangements can be made between the various managements of the two institutions, they have been made.

"The break in athletic relations occurred as a result of a baseball game in Providence in April, 1907. Cape C. T. Skillen of the Dartmouth nine removed his team from the field in protest against a decision to which he objected. A few days later the Brown Athletic Association decided formally to break off all athletic relations with the Green. Since then the alumni of both institutions have tried to bring about a renewal of relations, but without success, until Brown recently sent an invitation to Dartmouth for a dual relay meet.

"Dr. F. W. Marvel, physical director at Brown University, yesterday confirmed the report that relations with Dartmouth had resumed athletic relations. The arrangements, he stated, were very informal on both sides, and the closing of the breach was started by the invitation from Brown for the Hanover athletes to send its relay team against the Brunonian on Feb. 20 in the armory athletic meet here.

"The Brown Athletic Association has notified Dartmouth that the managers of the various athletic teams here had been requested to write to the managers of the corresponding Dartmouth teams inviting them to compete against Brown. The invitations were received at Dartmouth in a spirit that has overcome the breach.

"Dr. Marvel stated that while there is no probability that the two colleges will meet in football next fall, yet there is a probability that they may meet on the diamond this spring, as the baseball schedule is very flexible.

"Brown undergraduates have received the news with the greatest of interest and to all but a chosen few it comes as a complete surprise.

YALE CAPTAIN DENEGRE OUT OF BOAT RACE

Is Not Likely to Row in the Harvard-Yale Race

NEW SHELL FOR YALE CREW

Many Old Men of the Crew Are Missing This Season

About the Yale Club in this city there is a well-defined report that for the second time in its history the Yale varsity crew will be without the services of its captain, Bayne Denegre, in its shell in the annual Yale-Harvard race. Clever oarsman as he is, Denegre has some sort of a technical defect in his watersmanship which causes him to clip his stroke and so upset the balance of the boat. Coach Nickalls has tried every way he can think of to make him correct this fault. But it hangs, and Capt. Denegre, rather than risk the weakness of his crew, has decided to stay out of the shell unless he can show without a question in the races that are to be rowed on the Schuylkill and at Carnegie Lake in the early season that he has been able to overcome the technical fault. Denegre retains all the responsibilities and duties of a crew captain, which at Yale are rather autocratic, and no one wishes to deprive him of them. He has expressed himself as determined to force the pleasure of rowing, and his Alma Mater if a better man can be found.

Changes in the Yale calendar bring the annual social week, with its pre-race and reception, into February instead of January, as heretofore. On that account, Capt. Denegre will not call his men together for preliminary rowing until Thursday, Feb. 11.

Yale will be without the services of Jack Appleton, the slender lad who stroked his crew to the hard-fought victory on the Thames last summer. Just who his successor will be is not decided. The spring work will still call for a strong crew, but Henry Coe of this city, who pulled out No. 6 in his freshman crew last year, is looked upon as the best of the material which the work of the past season has shown, even though he is a sophomore. He stroked the crew that won the fall regatta and did it well, beating crews stroked by Robert Gillman and Huntington Morse, the former the stroke of the Yale second eight of a year ago. Coe had an eight of novices in the fall regatta, but beat the second crew of thearsity outfit, which was stroked by Gillman. Therefore, it is the general belief among Yale men here that he will be called on for this important work this summer, if he improves, as it is pretty certain that he will.

Nickalls is not talking about the probabilities nor is Denegre in an official way; but it is known among the men who are interested in Yale rowing that both have a very soft spot in their hearts for Coe, who has the strength, the nerve, and the necessary coolness and bulldog tenacity of purpose to make an ideal stroke oar. Stuart Low, Moore, and Sheldon of last year's crew, are still in college, and all have expressed a willingness to row again this season. Seven of the second eight-oar crew are still in college to compete with them for places in the boat.

A new shell for the varsity crew is now being built in England on Nickalls' orders, and will be fitted with tholepins instead of the conventional row-locks which have been used by Yale crews for the past few years. Nickalls believes the new shell to be better. The new shell thus fitted will be the first used in the race on the Schuylkill. The balanced seating, instead of the uneven seating of the ordinary English shell, will be adhered to in the new model shell.

R.V.C. Hockey Game Won by Senior Team

Juniors Overwhelmed in Fast Game by the Senior Team

The R. V. C. Seniors kept up the good record which the class has always maintained, by gaining a sweeping victory over the Juniors, by the overwhelming score of 8-1. The place of this combat was the R.V.C. rink, and the time yesterday afternoon. The glass-like surface of this rink has been the scene of an action of many a hard fought match in years gone by, but yesterday's contest surpassed them all, not only for the brand of hockey displayed, but also for its many amusing situations.

On account of the extreme frigidity of the atmosphere, the crowd was necessarily small but those (and there were three or four) who dared to brave the icy elements, were furnished with plenty of excitement and amusement. Others who were not so courageous kept an eye on the proceedings from the windows of the college.

Yale will be without the services of Jack Appleton, the slender lad who stroked his crew to the hard-fought victory on the Thames last summer. Just who his successor will be is not decided. The spring work will still call for a strong crew, but Henry Coe of this city, who pulled out No. 6 in his freshman crew last year, is looked upon as the best of the material which the work of the past season has shown, even though he is a sophomore. He stroked the crew that won the fall regatta and did it well, beating crews stroked by Robert Gillman and Huntington Morse, the former the stroke of the Yale second eight of a year ago. Coe had an eight of novices in the fall regatta, but beat the second crew of thearsity outfit, which was stroked by Gillman. Therefore, it is the general belief among Yale men here that he will be called on for this important work this summer, if he improves, as it is pretty certain that he will.

Nickalls is not talking about the probabilities nor is Denegre in an official way; but it is known among the men who are interested in Yale rowing that both have a very soft spot in their hearts for Coe, who has the strength, the nerve, and the necessary coolness and bulldog tenacity of purpose to make an ideal stroke oar. Stuart Low, Moore, and Sheldon of last year's crew, are still in college, and all have expressed a willingness to row again this season. Seven of the second eight-oar crew are still in college to compete with them for places in the boat.

A new shell for the varsity crew is now being built in England on Nickalls' orders, and will be fitted with tholepins instead of the conventional row-locks which have been used by Yale crews for the past few years. Nickalls believes the new shell to be better. The new shell thus fitted will be the first used in the race on the Schuylkill. The balanced seating, instead of the uneven seating of the ordinary English shell, will be adhered to in the new model shell.

MCGILL TEAM WINS ANOTHER HOCKEY GAME

Shamrocks Were Whitewashed By Red and White Team

RAINBOTH SCORED FOUR GOALS

The McGill team won another game last night, beating the Shamrocks by the tune of 5 to 0. The game was not brilliant by any means, but was fairly good to watch. The Red and White did not seem to have much pep left after the Toronto trip but nevertheless played very steadily. The particular bright spots of the game were Rainboth, Kelly and Mullins. Rainboth and Mullins, for Shamrocks, Monty in goal for McGill played in brilliant style.

The game started at a lively pace. McGill carry the puck down from the face off, but the Shamrocks return. Rainboth, Kelly and Mullins, Rainboth coming up together in fine style but nothing results. Mullins rushes and shoots but Monty saves. Rainboth misses a good chance on a pass from Rainboth. Kelly rushes from the Shamrock end only to hit the ice in front of the McGill net. Rainboth returns like a flash, but has no luck. Then Kelly, Burrows and Ledoux come up, but have no success. Morris Rainboth and Rainboth come down abreast and on a nice pass from Morris the latter scores the first goal of the game. Mullins now replaces McGill and rolls in a long one, but Monty saves. Rainboth and Mullins drive away but Mullins steals the puck. Rainboth tries a couple of shots and nearly scores. Rainboth also misses. Brownie varies it a bit by trying a shot, but to no end. The McGill defence is playing well and little gets past them with the exception of a few long shots. The forwards are working well together but have trouble getting their passes properly placed, resulting in many off-sides. Brown Rainboth and Rainboth come down together and later passes a good one to Rainboth, who fails to get it past Mullins. McGill and W. Dunlop both take shots to no end. Rainboth and Kelly come down together and later passes a good one to Rainboth, who fails to get it past Mullins. McGill and W. Dunlop both take shots to no end.

EYES EXAMINED ACCURATELY

READ WHAT PEOPLE SAY

Gentlemen,—I received my glasses on Monday, and am glad to say that they suit my sight admirably. My eyes are not painful since you examined and fitted me.

You have given me such relief that I wish you every success, as I feel that what you have done for me you can do for others.

Yours, truly,
ANNIE H. MACNEILL,
Chatham, N.B.

Suspension of Class Players Is Announced

Athletic Association Publishes List of Players Ineligible For Class Series

The following men whose names have been handed in to the athletic association as possible competitors in the class hockey series, are ineligible: Dentistry 16—Parke, Dentistry 17—F. G. Derrick, Medicine 18—F. Poulin, H. W. Robillard, Science 15—P. Loggie, W. Ross, W. Grant, W. Scott, Arts 16—A. MacKenzie, Arts 15—H. Robinson, E. Skinner, Science 17—M. J. Brophy, Jacques. If any of the above have competed they are automatically suspended from further participation in college athletics and are reinstated by the athletic association.

SPRING FOOTBALL PRACTICES START AT STANFORD SOON

Rugby Squad Must Turn Out for Work Three Times a Week

Spring football practice will be inaugurated next week when Captain-elect Danny Carroll, '16, will call to arms all Rugby players who are not current major sports.

Beginning Monday afternoon, the spring Rugby squad will don their war togs three times a week, on Mondays, Wednesdays, and Fridays, and practice on the varsity turf. Spring football will consist mainly of kicking, dribbling, and other light work, though there will be informal games each day. Commandant Carroll will be on hand to direct the rehearsals. Men in other gymnasium squads will be able to transfer to the Rugby squad, and get credit for gymnasium work.

Many of the 1915 varsity veterans have signified their intention of turning out next Monday, but several are at present candidates for positions on other varsity teams. Lachmund is training for track work. Austin is on the varsity ball squad, and Pettigill is out for crew, but Urban, Erb, Soper, Braden, and Wylie will be in the field for the first spring Rugby practice. Captain-elect Carroll urges all men who are new to Rugby, and who expect to go out for the team next year, to take advantage of this preliminary work—Stanford.

According to a census computed at Bowdoin College, then engaged in eight kinds of athletics are above the average of the college in scholarship. The average of the entire institution is represented by 12.3, while the average of the athletes is 14.8. Cross-country runners stand highest among the athletes with 17.3, and tennis, which is the only sport below the general average, ranks lowest, with an average of 10.

ELIMINATION TRIALS TO BE HELD TO-DAY

220 Yd., 440 Yd. and 880 Yd.
Dash, the Relay and Potato
Races To-day

RACES MUST BE RUN TO-DAY

Only Those Who Competed in Elimination Trials in these Events to Run on Wednesday

There was a good turnout at the gym yesterday, when part of the elimination trials for the track events and for the potato race were held. Eighteen more entries were received which brings the total up to one hundred and sixty-eight. With such a large number of competitors and many dark horses in the field the outlook for an exceptionally successful meet on Wednesday is quite promising. In fact there is going to be no one-sidedness to any one of the events. But few a competition and good-natured rivalry will be the dominant feature in every race.

Owing to the nature of the track it was found necessary that elimination trials had to be held for the following events: The potato race, 220 yards, 440 yards, 880 yards, and the relay race. So all who are intending to compete in these events, if they did not run their elimination trial yesterday, must do so today at the usual hour, otherwise they will not be eligible to compete on Wednesday. In all the other events, however, entries will be received on Wednesday.

The following are the results of the trials held yesterday:

POTATO RACE.

1st heat—
Gould (1st), time 35 1/2.
Hickson (2nd).
2nd heat—
Elliott (1st), time 33 1/2.
Lynch (2nd).
3rd heat—
Dean.
4th heat—
T. D. McGregor (1st), time 34 3/4.
Dawson (2nd).
5th heat—
Schiffeld (1st), time 31 3/4.
Smyler (2nd).
6th heat—
Derouher and P. Falls (tied), 35 1/2.
Wash.

This entire Gould, Elliott, T. D. McGregor, Forbes, Schiffeld, Dorochee and Palmer to run on Wednesday. With the winner of the trials held today, the above will be eligible to compete in the semi-finals and the final held on Wednesday.

There was some fast times made in the 220 yard dash. Considering that these times were made whilst running against time, they are exceptionally good.

Jeffries..... 30 2 1/2 Secs.
Cushing..... 30 3 1/2
Crombie..... 31 2 1/2
Schiffeld..... 31 3 1/2
Schiffeld..... 31 3 1/2
Antliff..... 31 3 1/2
Falls..... 31 4 1/2
Forbes..... 32
Matthews..... 32 2 1/2
Tushey..... 34 1 1/2
Richardson..... 35 1 1/2

In the 880 yards, the following times were made:
Woods—2 min. 31 1/2 sec.
Miles—2 min. 35 sec.
Gerrie—2 min. 39 1/2 sec.
Ironstone and Dean also had a try at this event.

The only relay team which had their event was that of the class of Science 17. The team was composed of Cushing, Forbes, Crombie, Jeffries. Time, 2 min. 11 1/2 sec.

Eric Cushing and his whirlwind classmate, certainly, have a splendid chance to win this event. Eric is getting into condition and no doubt he will again hold down his position as all-round champion. However, he will have to do his best as there are several in the field right after his scalp.

In the 440 yard dash, Woods ran an exceptionally splendid race. Considering that such fast time was made whilst running against time, it is practically certain that the old record must go.

In the 880 yards, Woods ran an exceptionally splendid race. Considering that such fast time was made whilst running against time, it is practically certain that the old record must go.

Post entries are received in all events to-day, so if you have not already entered, it is not yet too late to do so. The following men are especially requested to turn out at the gym to-day at 5 o'clock for a trial in the events in which they have entered:

In the potato race—E. O. Thomas, S. G. Baldwin, W. A. Hunter, Keller, A. Farlinger, Loughery, Joe Sanders, J. G. Myers and anybody else who is able to pick up spuds. Also the following: K. Rosebrugh, R. M. Deew, A. N. Reynolds, I. Kert, H. C. Lee, and E. C. Brown.

For the 220 yards dash—E. O. Thomas, W. A. Hunter, Rex Hovey, Davidson, Almond, C. P. Roman, Fraser, K. Rosebrugh, R. M. Deew, J. G. Myers and W. C. Ross.

For the 440 yards dash—All those who intend to run this event. The following are especially requested to be out to-day: Karl Forbes, Don Smelzer, Rex Hovey, Eric Cushing, Bill

DARTMOUTH AND BROWN ATHLETES TO MEET AGAIN

Athletic Relations Renewed Between Two Institutions After Eight Years—Relay Race at Providence Feb. 20 Is First

Hanover, N. H.—Dartmouth College graduates and undergraduates are much pleased to-day over the announcement that athletic competition with Brown University is to be renewed this winter after a lapse of eight years. The first event is to be a relay race at Providence, Feb. 20.

In explanation of the renewal of competition between the Green and the Brown, Graduate Manager J. E. Ingersoll of the Dartmouth athletic council issued the following statement Tuesday night:

"The invitation to meet the Brown relay team in a dual race at the Providence A.A. armory, Feb. 20, has been accepted. For many years the two institutions have been in friendly relations, and in all branches of sport whenever satisfactory schedule arrangements can be made between the various managements of the two institutions, they have been made.

"The break in athletic relations occurred as a result of a baseball game in Providence in April, 1907. Cape C. T. Skillen of the Dartmouth nine removed his team from the field in protest against a decision to which he objected. A few days later the Brown Athletic Association decided formally to break off all athletic relations with the Green. Since then the alumni of both institutions have tried to bring about a renewal of relations, but without success, until Brown recently sent an invitation to Dartmouth for a dual relay meet.

"Dr. F. W. Marvel, physical director at Brown University, yesterday confirmed the report that relations with Dartmouth had resumed athletic relations. The arrangements, he stated, were very informal on both sides, and the closing of the breach was started by the invitation from Brown for the Hanover athletes to send its relay team against the Brunonian on Feb. 20 in the armory athletic meet here.

"The Brown Athletic Association has notified Dartmouth that the managers of the various athletic teams here had been requested to write to the managers of the corresponding Dartmouth teams inviting them to compete against Brown. The invitations were received at Dartmouth in a spirit that has overcome the breach.

"Dr. Marvel stated that while there is no probability that the two colleges will meet in football next fall, yet there is a probability that they may meet on the diamond this spring, as the baseball schedule is very flexible.

"Brown undergraduates have received the news with the greatest of interest and to all but a chosen few it comes as a complete surprise.

YALE CAPTAIN DENEGRE OUT OF BOAT RACE

Is Not Likely to Row in the Harvard-Yale Race

NEW SHELL FOR YALE CREW

Many Old Men of the Crew Are Missing This Season

About the Yale Club in this city there is a well-defined report that for the second time in its history the Yale varsity crew will be without the services of its captain, Bayne Denegre, in its shell in the annual Yale-Harvard race. Clever oarsman as he is, Denegre has some sort of a technical defect in his watersmanship which causes him to clip his stroke and so upset the balance of the boat. Coach Nickalls has tried every way he can think of to make him correct this fault. But it hangs, and Capt. Denegre, rather than risk the weakness of his crew, has decided to stay out of the shell unless he can show without a question in the races that are to be rowed on the Schuylkill and at Carnegie Lake in the early season that he has been able to overcome the technical fault. Denegre retains all the responsibilities and duties of a crew captain, which at Yale are rather autocratic, and no one wishes to deprive him of them. He has expressed himself as determined to force the pleasure of rowing, and his Alma Mater if a better man can be found.

Changes in the Yale calendar bring the annual social week, with its pre-race and reception, into February instead of January, as heretofore. On that account, Capt. Denegre will not call his men together for preliminary rowing until Thursday, Feb. 11.

Yale will be without the services of Jack Appleton, the slender lad who stroked his crew to the hard-fought victory on the Thames last summer. Just who his successor will be is not decided. The spring work will still call for a strong crew, but Henry Coe of this city, who pulled out No. 6 in his freshman crew last year, is looked upon as the best of the material which the work of the past season has shown, even though he is a sophomore. He

THE MILITARY HAPPENINGS AT OLD MCGILL

Company 'C', Order No. 8

By Capt. George C. McDonald, Officer Commanding "C" Company,
McGill Contingent, C.O.T.C.

Feb. 1st, 1915.

OFFICERS' CLASS—

The Special Drill for the Officers' Class will be held on Tuesday, Feb. 2nd at 5.15 p.m., in the Drill Hall, Craig St.

COMPANY PARADE—

The Company will parade on Thursday, Feb. 4th, at 7.45 p.m. in the Old High School Gymnasium.

BAYONET FIGHTING—

Sections 15 and 16 will attend at the Physics Bldg., on Friday, Feb. 5th, at 5.15 p.m., for instruction in Bayonet Fighting.

SHOOTING—

Sections 5 and 6 will attend at the C.O.T.C. Headquarters on Friday, Feb. 5th, at 7 p.m., for Shooting.

AIMING—

Sections 7 and 8 will attend at the Old High School on Friday, Feb. 5th, at 7.15 p.m., for Aiming.

DETAILS—

Orderly Sergeant for week ending Feb. 5th:
Corporal J. L. A. Robertson.
Next for duty: Lance Corporal T. A. Williams.
(Signed), GEORGE C. McDONALD,
O.C. "C" Company,
McGill Contingent C.O.T.C.

NOTICE

14th PLATOON,
Aiming and Shoot-
ing.

Owing to the lecture by Mr. Mott, last Thursday, arrangements have been changed for aiming and shooting to-day, Tuesday.

The whole platoon will go to aiming drill, Old High School, at 7.30, excepting two selected parties who will assemble at the C.O.T.C. headquarters under Corp. Gervers and Lance Corp. Slade at 7 o'clock.

A. S. EVE,
Licut.

War Summary

These Articles Are Specially Written for the McGill Daily and will be Published each Day.

FRANCE

The Princess Patricia's in France are upholding the name of Canada, and doing splendid work for the Motherland. They have been charged upon twice in the last four days, but the enemy never succeeded in getting nearer than 40 yards. The point where the Germans made the most ground was in an angle between two of the Canadian trenches. This fact helped our men to surround and capture sixty Germans. The men captured turned out to be Landsturm and were armed with an old pattern rifle. This shows the type of soldier the Germans are putting into the field.

The day of Jan. 31 was marked by heavy artillery fighting. To the south-east of Ypres the Germans attacked the French trenches, but were repulsed by the French artillery with heavy losses.

Along the battle-line near the Aisne River, near its junction with the Oise, the French batteries were successful in destroying several trenches in the course of construction. In the Argonne the day was very calm. The Germans have been heavily defeated in this section in the past few days, and are evidently resting, preparatory to a renewed resistance.

In the rear of the battle-line in France, there are tremendous reinforcements all ready for battle. These men have all arrived from England recently and are in camp between the firing-line and the coast.

RUSSIA

The Russians have gained a great point in the Carpathians. Turning aside the wing of the Austrian army, the Russian forces are beginning to pour over the Carpathians by the Dukla Pass, and have started on an almost unresisted invasion of Hungary. This great move was the result of a battle between the Russians and the Austrians, where one thousand of the latter were killed. The Austrians are in full retreat, leaving guns and ammunition behind. The Germans admit this Austrian defeat in their official notices.

ENGLAND

In spite of the German submarine attacks, which took place a couple of days ago, the British are not in the least unsettled. The trans-Atlantic and other ocean boats are continuing their sailings as usual. The Irish Channel is being patrolled by warships which are keeping a close watch for a repetition of the German submarine raid.

DETAIL REGIMENTAL ORDERS WEEK ENDING FEBRUARY 6.

TUESDAYS—
5.15 p.m.—Instruction Drill, "C" Co. (C.O.T.C.) Old High School.
9.45 p.m.—Company Drill, High School ("A" and "B" Companies).

EGYPT AND THE AUSTRALIANS

Now that the Turkish and German leaders embark upon the Egyptian campaign, they will find a formidable force awaiting them. Those who are anxious about the safety of the Suez Canal may, to use the words of Lord Fisher to the City Fathers, "sleep quietly in their beds." If campaigns are won by the zeal and enthusiasm of highly trained and disciplined troops, Britons may be assured that this link of Empire is perfectly safe. It is not necessary, nor indeed desirable, to state the number or the disposition of troops, but it is sufficient to say that they are ready where they will be wanted. The forces available include battalions of Territorial, the Indian Army, the Imperial Service contingents which the ruling Princes of India contribute to the Empire's defence, and troops from Australia. It is really a blessing in disguise that these native regiments are stationed in Egypt. If they had been directed to Flanders, they would have been tried severely by the cold and wet in the trenches, and probably the sick list would be heavy. It is a mistake to suppose that all Indians are affected by the cold. The Chirkhas stand variations of temperature very well, and there are sometimes perishing nights where the Punjabis come from. The army defending the canal has brought its entire equipment from India. It does not even rely on Egypt for its food, and if any portion of the canal is attacked the troops defending it can be reinforced with a rapidity which will astonish the German leaders of the Turks. There is a railway which is a strategic line, though it is not designed for military purposes, and within an hour fresh troops can be run up to any part of the canal. Further than this the waterway will be open. The troops are longed to see a modern instrument of warfare which they have humorously described as "The Yellow Peril," go into action. The airman interest them, too, and they would like to hear a battleship speak.

Before his departure from Egypt for England, Sir George Reld, High Commissioner for the Commonwealth of Australia, issued an eloquent farewell letter to the Australian troops, in the course of which he put it on record that they had "excelled every other display of manhood I have ever seen." He enjoined them to devote themselves to duty and to remember "that the liberties of mankind are involved just

Is The Money You Spend Helping Canada?

(Prepared for the McGill Daily by the Desbarats Advertising Agency.)

- ¶ Certain of us are, for various reasons, debarred from going to the front, but there are other ways by which we can do our duty and show our loyalty.
- ¶ We can buy Canadian-made goods and keep our money circulating in Canada.
- ¶ But, to do this, the consumer must be educated to the use of the Canadian product.
- ¶ And this can only be done by advertising.
- ¶ You, the manufacturer, and you, the retailer, as loyal Canadian citizens, owe it to your country to make your goods known to the Canadian public.
- ¶ Have you made, or are you making any effort in this direction? Now is your opportunity.
- ¶ The firms who are now advertising in the McGill Daily are doing their duty.
- ¶ Every reader, therefore, should, wherever possible, patronize them.

Miss M. Poole, 45 McGill College Ave.

street to Savoy House, in the Strand, Mr. Harcourt, in declaring the premises open, said: "We appreciate all that has been done by Western Australia, not only for England, but for the Empire at large, and what it all means in the gifts of men and money, fellowship and loyalty and love itself. The splendid Australian contingent that is now being prepared for service at the front has happily been able to land and complete its training in Egypt. We hear the best possible accounts of the progress the Australian troops are making with their training."

WAR SURGERY IS VERY MERCIFUL

If the great war reveals an advance in the science of killing, it is also notable, according to a writer in the Paris Journal des Debats, for great progress in the treatment of the combatants who have the lesser ill-luck to be merely wounded. In proof of this contention he offers us the record of a surgical hospital at Vichy, where, in one month, out of a total of 600 operations—or about twenty per day—less than ten amputations were found necessary. Those that were made necessary, were minor operations, involving the loss of a finger or toe. The writer admits having seen more serious operations, as, for instance, the amputation of a leg, an arm, a hand; but they are very few in comparison with the records of war forty to fifty years ago. "The number will remain small, too," he says, "because happily for our wounded, amputations are no longer the fashion. The reason for this he explains by quoting a Paris medical authority as follows: 'Conservation should be the rule in treatment of cases of bullet fractures. In an immense majority of cases complete healing is sure to follow, no matter what bone is hurt or how badly.' A similar doctrine was propounded, the writer tells us, by another medical authority as the result of experience in the Balkan war. He adds:

"With wounds from modern projectiles, especially the bullet, which remains the most effective of all—being the cause of death or injury in 80 cases out of 100 in 1870 and of 81 in the Russo-Turkish war—a great and most favorable change is to be noted. The

region of the wound is smaller and more localized. As to bone splinters they are small and numerous, while long ones are infrequently found. The first impression is that the case is very serious, that the limb is lost. No other thought occurred to surgeons a hundred years ago, who were responsible also for the former practice of withdrawing all bone splinters from a wound."

The writer then cites authorities as stating that amputation is justifiable only when "the mortification of the extremity is in itself fatal." In fact, amputation is permissible only in the case of gangrene, or when the patient shows signs of being unable to withstand infection or lack of resistance against the toxic conditions resulting from the wound."

ODE TO LATIN.
All the people dead who wrote it;
All the people dead who spoke it;
All the people dead who learn it;
Blessed death! they surely earn it.
—Orange and Black.

Manager W. F. Donovan, of the New York Americans, returned to New York Monday from Philadelphia, for a conference with Col. J. J. Rupert, Jr., and Capt. T. L. Huston. Donovan will attend a dinner of the Chamber of Commerce at Columbus, Ga., Thursday night and will hear a proposition to bring his players to that city. It is known, however, that Donovan favors Savannah, where his champion Providence team prepared last year. Donovan has accepted the terms of "Catcher Schwert," who made a splendid record with the University of Pennsylvania team last season. Schwert did well in several games on the last western trip and Donovan believes all he will improve with experience.

W. F. Ross, '15, is not only this year's strongest man in Yale University, but he also holds the honor of making the best record ever made by a Yale undergraduate. In his test this fall he scored 2,978 points; 305.8 more points than he made in 1913 which was a new Yale record at that time. His record for 1915 follows: Strength, right forearm 148
Strength, left forearm 144
Strength, back 487
Strength, legs 307.8
Strength, pull ups 107
Strength, push ups 24

PROVINCE OF QUEBEC

Department of Colonization, Mines, and Fisheries

The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES. First of all, obtain a miner's certificate, from the Department in Quebec or from the nearest agent. The price of this certificate is \$10.00, and it is valid until the first January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of the certificate may stake mining claims to the extent of 200 acres.

WORKING CONDITIONS. During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING. At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE. The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year and a fee of \$10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION. Notwithstanding the above, a mining concession may be acquired at any time at the rate of \$5 an acre for SUPERIOR METALS, and \$3 an acre for INTERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land, where important mineralized belts are known to exist.

PROVINCIAL LABORATORY. Special arrangements have been made with the POLYTECHNIC SCHOOL of LAVAL UNIVERSITY, 225 ST. DENIS STREET, MONTREAL, for the determination, assays and analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the province, on application addressed to:

HONORE MERCIER,
Minister of Colonization, Mines and Fisheries, Quebec.

ORDERS ISSUED FOR MUSKETRY INSTRUCTORS

Until Further Notice the Instructors in Musketry Will Take Duty as Follows:

"A" COMPANY—

Baker, Pte., New High School, Thurs., Fri.
Burn, Cpl., Old High School, Thurs., Fri.
Cameron, Cpl., Morgan's Range, Thurs., Fri.
Lyman, Cpl., Morgan's Range, Monday; Old High School, Thursday.

Timberlake, Sgt., Morgan's Range, Mon., Thurs.

"B" COMPANY—

Fair, Sgt., Old High School, Mon., Thurs.
MacPherson, Cpl., Old High School, Monday; New High Sch., Thursday.

McDougall, E. M., Old High School, Thursday; New High Sch., Friday.

Sutherland, Sgt., Old High School, Monday; Morgan's Range, Thursday.

"C" COMPANY—

Costigan, Cpl., New High School, Mon., Tues.
Currie, Cpl., Old High School, Tues., Fri.
Forster, Pte., Old High School, Monday; Morgan's Range, Tuesday.

Gallop, Pte., Morgan's Range, Tuesday; New High School, Thursday.

Ludlow, Pte., Old High School, Tues., Thurs.

McDougall, J. C., Cpl., Old High School, Tues., Fri.

Ralston, Sgt., Old High School, Tues., Fri.

Scott, H. M., Pte., Morgan's Range, Mon., Fri.

Scott, Hope, Pte., Old High School, Monday; New High School, Friday.

"D" COMPANY—

Buckley, Cpl., New High School, Mon., Tues.

Johnston, H. W., Cpl., Old High School, Tues., Fri.

Simpson, Sgt., New High School, Mon., Tues.

Instructors for Aiming work will attend at OLD HIGH SCHOOL at 7.15 p.m. and for Range duty at the O.T.C. ARMOURY at 7 p.m.

Much of Interest to Student Contained In University Statement

Only Three Dollars of Caution Money was Left Unclaimed Last Year—Salaries of Janitors, Labourers, etc., Reach Total of \$28,110.28

How much does it cost to run a modern university? An approximate answer to this question may be secured by a perusal of the financial statement of the Royal Institution for the Advancement of Learning (otherwise McGill University) for the year ending June 30, 1914, made possible by the McGill Daily through the courtesy and co-operation of W. Vaughan, Bursar.

Since space does not permit of the publication of the statement in its entirety, the same purpose may perhaps be served by an enumeration of the points in it which will be of the greatest interest to the student body.

The original endowment and donation in land by bequest of Hon. James McGill amounts to \$426,478.04. Added to this there are donations of lands, buildings and apparatus valued at \$7,162,742.78. Of this Sir W. C. Macdonald's donations alone amount to \$7,162,742.78. The University has received \$1,432,045.32, endowed library funds to \$189,329.59, and fellowships, scholarships, prizes, etc., to \$1,979,965.62. Other miscellaneous endowments amount to \$6,629,998.61, making a total of endowments of \$9,380,443.16.

The value of the immovable property of the University is given as \$7,924,457.11, made up as follows:—
College grounds \$1,602,463.61
Main Building—Centre 89,722.02
Building, East and West wings and corridors, etc. 860,359.89
Porter's Lodge 2,156.00
Observatory Building 4,228.29
Transit houses 465.50
Thomas Workman Mechanical Workshops 88,206.51
Thomas Workman Mechanical Workshops 67,034.14
Macdonald Physics Build-

OTTAWA CALLS FOR WIRELESS OPERATORS

Those Interested in Overseas Service Will Meet at 5.50 To-day in Physics Building

Information has been received from Ottawa that there is an immediate demand for wireless operators for overseas service.

Operators must use the international code, and a speed of twenty-five words a minute is desired. Men with a knowledge of gas engines and electrical apparatus might be considered as eligible, even if they have not yet reached the necessary speed.

A short meeting of those interested will be held in the Physics Building, lecture theatre, at 5.50 p.m., on Tuesday, Feb. 2.

COLLEGE STUDENTS STUDY QUESTION OF WHY THERE IS WAR

"The World Said it Wanted Peace—It Got War—Why?"

August Schvan, former secretary to the Foreign Minister of Sweden and once an officer in the German army, has been added to the staff of international experts sent by the Carnegie Foundation for International Peace to leading colleges of the country to organize clubs for the study of international affairs. It is announced, "All the world said it wanted peace. It got war. Why? We want to get the college men to thinking about this problem," says Mr. Schvan.

Study clubs of students have been formed at Harvard, Yale, Cornell, Brown, Trinity and Syracuse, the statement says, and the work is cordially supported by college presidents. Spencer Miller, graduate student of Columbia University, will start shortly on an organization trip through New England. It is planned to include women as well as men's colleges.

Courses in the large state universities of the Middle West, given nightly for a week, are conducted by Dr. John Meier, a German specialist in international law, \$15,229.25; Faculty of Applied Science, \$102,187.19; Faculty of Medicine, \$52,445.50; Royal Victo-

Ria College, \$23,340.39; Conservatorium of Music, \$17,315.33; Library, \$4,298.00; Gymnasium, \$2,316.25; miscellaneous, \$12,442.98. Other receipts included additional endowments amounting to \$1,307,162.75; grounds, buildings and equipment, \$14,750.74; investments repaid, \$748,448.92; gain on realization of investments, \$468.55; income capitalized, \$21,629.79.

The undergraduate will be interested in learning that the supervision of his examinations, known to university students as "invigilation of examinations" costs \$360.50; that the "salaries and wages for janitors, servants, laborers, materials for cleaning, etc." reach \$28,110.28; that out of a total of \$13,224 caution money deposits, only three dollars was left unclaimed; that the salaries of Principal, Secretary and Registrar's Office, Library and Observatory Staffs, Examiners, Stenographers, etc., amount to \$37,055; those for instruction (including Deanships), \$288,836.87 and those of foremen in workshops, mechanics, laboratory assistants, etc., \$28,110.28. Other items appearing in the list of Disbursements are:

For repairs and improvements to buildings \$21,729.95
For apparatus, machines, tools, equipment, etc. 15,908.70
For maintenance of apparatus, etc. 3,395.92
For supplies and materials, 11,347.62
For housekeeping supplies, Royal Victoria College 9,562.86
For summer schools 10,700.05
For furniture 2,497.88
For light, heat and power 49,773.07
For printing 9,728.62
For advertising 1,095.22
For insurance 1,057.88
For stationery and postage 6,588.09
For water 3,297.59
For miscellaneous 23,243.75
For scholarships, exhibitions, medals and prizes 11,372.25
For Library—for books, etc. 11,079.01
For activities 8,058.23
For advances and extraordinary expenditures 68,425.07
All of which goes to show that the task of "running" a university is one which cannot be considered a light undertaking, and that the above students will probably have more sympathy with the staff in the Bursar's Office, which bears the brunt of the work of seeing to it that the business affairs of the "Royal Institution for the Advancement of Learning" are regulated in the best possible manner.
